Instructions

This list embraces our offers for the spring season of 1920—canceling all previous prices. We will not issue a descriptive catalog this season, but will gladly mail a copy of a former issue, giving cultural directions and describing the various varieties to those who request same.

LOCATION

Our Nurseries and Fruit Farms are located one mile southeast of Sumner Depot. We are always glad to welcome visitors and to consult with prospective customers on any phase of the small fruit industry. We solicit your correspondence if we can be of service.

TERMS

Our prices are for stock packed and delivered at Sumner shipping station. Cash should accompany order or special arrangements made for terms.

GUARANTEE

We endeavor to give good value to all customers. We guarantee all plants shipped by us are first class when delivered to the carrier and true to name. If through error any should prove otherwise we will cheerfully replace them free of charge. We cannot guarantee all plants to live because it is impossible for us to know the conditions of planting and care they receive.

PLANTING TIME

For best results all planting should be done while the plants are dormant or before the plants start growth in the spring. Place your orders early to have stock ready when ground is workable.

SUBSTITUTING

We are sometimes out of the variety ordered and rather than disappoint our customers we may substitute another kind of equal quality and value unless we are instructed to the contrary.

COMPLAINTS

If any, should be made within ten days from receipt of shipment that we may make prompt investigation and adjust any errors for which we are responsible.
